

## **INSANE CRYPTO SYSTEMS LTD**

A development platform for the future

Insane is a forward-thinking technology platform with an eye towards future development. To further this development, Insane has incorporated in the country of England. The Insane team has plans on using all available resources to us as an incorporated entity to further future Insane technology.

**CERTIFICATE OF INCORPORATION  
OF A  
PRIVATE LIMITED COMPANY**

Company Number **10738227**

The Registrar of Companies for England and Wales, hereby certifies that  
**INSANE CRYPTO SYSTEMS LTD**

is this day incorporated under the Companies Act 2006 as a private company, that the company is limited by shares, and the situation of its registered office is in England and Wales.

Given at Companies House, Cardiff, on **24th April 2017**.

**INSANE CRYPTO SYSTEMS LTD certificate of Incorporation in England**

## **Insane is helping to build a blockchain centric future**

The tech being coded by Cryptocoderz is a platform that can pretty much do anything we can think of that can be assisted by a blockchain to store and distribute data. This includes the obvious and current use of monetary transfer as well as, messaging, marketplaces, content distribution, biometric services, data checking or logistical tracking to name but a few. The possibilities are limited only by imagination, the Insane team will continue to maintain and innovate this platform.

## **We want to best serve our community**

After a long process of back and forth discussion, it was determined that Insane Coin could best serve its present and future communities with a complete code upgrade. The code upgrade will serve as a platform for launching new and inventive technology that utilizes the Insane blockchain as a launching point.

## **What features will the Insane coin (INSN) code upgrade have?**

- POS Version 3 - The latest version of Proof of Stake.
- Master nodes - Earn from a 6% APR simplified interest scheme along with a share of Darksend sending fees. The Master node APR will halve to 3% after 4 years.
- Secure messaging - Do you want to send secure messages across the insane blockchain? You will now be able to.
- New ticker **INSN** - We are switching our ticket to something more Bittrex and Polo (among others) friendly.
- Instant transactions through master nodes - You will have the option of initiating instant transactions through the master node system.
- Darksend - Send your transactions anonymously with Darksend.
- POW turned back on - You can now mine Insane again. The block rewards system for Insane will be 1 Insane coin per block, plus a chance at 2 Insane coins by finding a random Insane block.

- Adaptive block sizes - Adaptive block sizes increase or decrease possible max block size depending on use of the chain, thus making the chain lighter when not being flooded with transactions and allowing the chain to not get bogged down by large amounts of use.
- 30 million coin hard cap - The future total amount of Insane will never reach more than 30 million coins.
- POW/POS **INSANE** blocks - The "Insane" blocks are similar to super blocks and offer higher rewards. You have an 8% chance of finding higher rate POW/POS blocks with a 2 Insane coin reward (instead of 1) for POW and 3% reward (instead of 1.5%) for POS.
- VRX retargeting - This retargeting system is similar to DGW but has been streamlined and made more robust.
- Velocity blockchain security system - Velocity is a prototype blockchain security system that secures the Insane blockchain through governance and restraint technology. The system acts as a "triple check" security feature against blockchain inconsistencies and possible exploits such as rapid block times, incorrect fees, insufficient balances and other issues that are widely used by programmers with malicious intent to cause damage to the blockchain..

### What about the websites?

In addition to these features, we will be rolling newly redesigned versions of our websites. The website redesigns will better position Insane as a forward thinking technology platform that doesn't only focus on the monetary aspect of blockchain technology.

## How will we accomplish these upgrades?

In order to completely upgrade Insane Coin for future development, we are going to have to initiate a hard fork and swap existing coins for new ones. The coin swap is going to be done in a very orderly and simplified fashion by using Nova Exchange as the only coin exchange agent . The process will be very simple

- \*The coin swap will be ongoing for 3 months at Nova Exchange

- \*The old insane blockchain will remain active during this time

- \* Once the swap is completed in 3 months all remaining coins will be destroyed by Nova Exchange.

- \*To Initiate a swap you will simply transfer your current Insane coins to your Insane coin address on Nova Exchange. Once they are on the exchange you need to initiate a swap by using this link Nova Exchange swap link

<https://novaexchange.com/coinswap/>.

*(\*\*\* Important\*\*\* Do not send your coins to the "destroy address" listed on the swap details page. You must only transfer the coins to your Insane coin address on Nova.)*

The vast majority of the coins will be exchanged very quickly after the exchange has been initiated. However, we are going to keep the exchange going for 3 full months in order to make sure nobody is left behind. The exchange will inevitably result in a small contraction of the money supply balance due to lost, forgotten and accidentally destroyed Insane coins.

## Conclusion

The Insane coin team doesn't take something as serious as a coin swap lightly and we know it might not be popular with everyone. However, once this orderly process is completed (and it will be orderly) we will be back on track with a fully updated backbone to launch future Insane tech from.
