Vision

The Solution

Generating an income stream with digital assets.

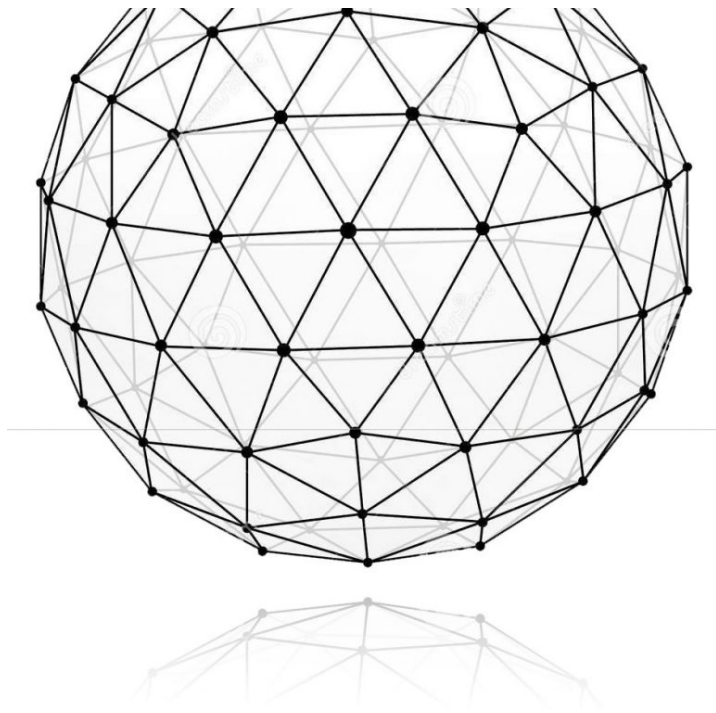

A coin which grows at a higher rate than your bank account does. Our cumulative interest model means you truly have an asset that increases in value so over a period of years your coin will mature into a savings pot. The solution is Embercoin.

That's what we believe is the core value and potential behind Ember and that's something we intend to keep at the heart of Ember in the best way we can whilst at the same time growing the value of the coin.

In a world where AI threatens to replace even highly skilled jobs, it is now more important than ever to be able to generate an income stream We believe computers should be used to serve mankind and improve life. Computing power can be used to generate income, not just take it away.
